Elog - Bug #12151

NullPointerException when redirecting after adding a comment

04/03/2016 08:13 PM - Kyle Hazelwood

Description

I need to check for the "Referer" header parameter when determining how to redirect the response after a comment/entry are added or edited. Looking at the code it seems obvious, but in three years I haven't seen this error. Is there a browser out there not sending the "Referer" header any longer? Or perhaps are they sending it with the propper spelling of "Referer" after twenty years of http spelling it wrong?

History

#1 - 04/04/2016 10:05 AM - Kyle Hazelwood

- Category set to Server

- Status changed from New to Assigned

- Assignee set to Kyle Hazelwood

This was caused by Beau trying out a new elog shift change comment app. He is not using a browser so the header is not being populated by default. I need to check for this.

#3 - 11/22/2016 07:11 PM - Kyle Hazelwood

- Status changed from Assigned to Remission

- Target version set to Version 1.0

#4 - 11/30/2016 02:06 PM - Kyle Hazelwood

- Status changed from Remission to Resolved

I no longer use the refer header for redirect.

#5 - 11/30/2016 02:06 PM - Kyle Hazelwood

- Status changed from Resolved to Closed
